Profile

Product Designer with 5+ years of experience designing end-to-end digital products across fintech, mobility, media, education, and trade. Experienced in leading 0-to-1 product development, conducting user research, building scalable design systems, and collaborating with cross-functional teams to deliver impactful user experiences. Led product design for Waystream, a live audio streaming platform serving 40,000+ users across Africa. Passionate about simplifying complex workflows, solving real user problems, and creating products that drive business growth.

Employment

Zyonel Technologies | Product Designer | Feb 2021 - Present

Technology company delivering product design, engineering, and digital products across media, mobility, trade, and education sectors.

In-House Project(Zyonel Technologies)

Waystream Global | Founding Product Designer | May 2022 - Present

Africa's first live audio streaming and podcasting platform | Mobile | Web | Desktop

- Joined during the product's formative stage and led end-to-end product design from concept to launch, helping shape the vision, user experience, and design foundation for a platform now serving 40,000+ registered users across Africa.
- Reduced onboarding drop-off by 25% by introducing one-tap Google and Apple signup, streamlining setup from six steps to two and enabling users to go live in under 60 seconds, tracked via Mixpanel.
- Average listeners per broadcast doubled following the introduction of real-time sharing capabilities, enabling creators to grow audiences while actively streaming, tracked via Mixpanel.
- Designed localized payment as a core part of the product from day one, solving a fundamental barrier for African creators trying to monetize; the feature became a key reason creators switched over from competing platforms.
- Designed creator monetization, live chat, event scheduling, donation tools, and local payment integration experiences.
- Supported more than 500 churches, creators, community organizations, and media groups in broadcasting live content across the platform.
- Built and maintained a scalable cross-platform design system, with accessibility baked in, including contrast compliance, touch target sizing, and screen reader considerations, supporting web, mobile, and desktop applications.

- Collaborated with engineers, product stakeholders, and leadership teams within a 7–10 person cross-functional environment. Designed and delivered across 3 platforms simultaneously while engineering was actively building, with scope expanding mid-delivery; managed through a living design system and modular, reusable components.

Learning Management System(LMS) | Product Designer | May 2021 - Aug 2021

Education Platform for Zyonel Academy | Web

- Designed end-to-end experiences for students, instructors, administrators, and super administrators.
- Delivered onboarding, enrollment, scheduling, lesson delivery, progress tracking, and payment workflows.
- Improved accessibility and usability for users with varying levels of digital literacy.

Client Project(Zyonel Technologies)

Full-service technology company delivering product design, software engineering, backend development, QA, and digital transformation services. Staffed concurrently across an in-house product and client engagements below.

Drive45 Mobility | Product Designer | Apr 2023 - Sep 2023

Digital Rent-to-Own Vehicle Subscription Platform | Web

- Replaced a fully manual paper-based process with a single digital system, eliminating operational bottlenecks across the subscriber lifecycle.
- Designed for 5 distinct user types simultaneously: Subscriber, Application Officer, Fleet Supervisor, Admin, and Investor, each with purpose-built dashboards tailored to their specific workflows and mental models.
- Reduced subscriber onboarding friction by introducing an income-based pre-qualification flow that surfaced eligible vehicles before commitment, cutting mismatched expectations and drop-off at the offer stage.
- Designed a due diligence explanation screen that significantly reduced abandonment at the payment step, giving subscribers full clarity on what they were paying for and what happened next.
- Collaborated with developers and stakeholders to ship a platform covering the complete vehicle ownership lifecycle: application, verification, offer signing, payment tracking, and ownership transfer.

Eximtrade Options | Product Designer | Sep 2021 - Jan 2022

Multinational B2B Import & Export Platform | Web

- Sole designer on a full end-to-end B2B platform supporting importers, exporters, suppliers, logistics providers, and payment systems.
- Designed end-to-end workflows covering onboarding, trade operations, logistics coordination, documentation, and payment integration.
- Translated highly complex, multi-party international trade processes into intuitive user journeys and scalable digital workflows.

- Established scalable UX patterns and information architecture to support future product expansion across international markets.

Independent & Volunteer Work

Inventory & Facility Management Platform | Product Designer | Jun 2024 - Oct 2024

Nonprofit Inventory & Facility Management Platform | Web

- Digitized 100% of facility request workflows, eliminating paper-based processes and giving managers real-time visibility into inventory and requests.
- Designed for 3 user types: Facility Managers, Internal Staff Requesters, and Members of the Public, creating the organisation's first-ever public-facing digital request channel.
- Solved a critical duplicate request problem by designing an in-app confirmation screen with a reference number and expected response time, eliminating ambiguity that caused staff to submit the same request multiple times.

Mentorship & Leadership

Zyonel Academy | Product Design Tutor & Mentor | May 2023 - Aug 2025

- Delivered structured training in UX/UI design, product thinking, design systems, and user-centered design.
- Mentored aspiring designers through portfolio reviews, design critiques, real-world projects, and career development sessions.
- Facilitated workshops on product strategy, design thinking, and problem-solving.

Skills

Product Design

UX Research · User Interviews · Experimentation · Service Design · Usability Testing · Growth Design · Product Strategy · Prototyping · Interaction Design · Accessibility · Information Architecture · Design Systems · AI Product Design

Tools

Figma · FigJam · Mixpanel · Google Analytics · Notion

Platforms

Mobile (iOS & Android) · Web App · Desktop App

Soft skills

Cross-functional collaboration · Stakeholder management · Design critique · Problem framing · Leadership · Mentoring

Education

Dec 2015 – Sep 2018

Lagos, Nigeria

University of Lagos, Nigeria

B.Sc. Physics Electronics
